Time Use Survey: Data collection methods and concepts
Regional Workshop

26-28 November 2019
Istanbul, Turkey
Place: Ramada Plaza by Wyndham Istanbul City Center

The three-day workshop, organized by UN Women, is aimed at strengthening the national capacities of key stakeholders from Eastern Europe, the Caucasus, and Central Asia to produce time use statistics on unpaid domestic and care work. It will also enhance monitoring and reporting of selected Sustainable Development Goal (SDG) indicators.

Participants: Practitioners from national statistical offices working on the planning, designing of survey methodology, data collection and processing of Time Use Survey (TUS), and experts from National Women’s Machineries from Eastern Europe, Caucasus, Central Asia, and Bangladesh.

Information about the time people spend in paid and unpaid work, and its contribution to economic growth and wellbeing, are essential for policymaking, and an important commitment in the Agenda 2030 for Sustainable Development. SDG 5 calls for recognizing, reducing and redistributing unpaid care work as a condition for achieving gender equality.
